RE: [Illegible]

Dear Mr. Douglas:

Based, to a large extent, upon the time and effort you devoted to this case, it has been settled as to the Defendants still in the case. On behalf of my client and my entire firm, I would like to thank you for all that you have done to help bring this case to a successful conclusion.

There are two more Defendants that are currently the subject of motions pending in the Superior Court and then perhaps appellate procedures to bring them back into the case. Therefore, I would ask that you maintain your file in this matter until I notify you otherwise.

The current trial date of September 8, 1998 will be vacated by the Court subject to being renewed if, and when, the remaining two Defendants are brought back in to the case.

Once again, thank you for assisting us in this matter.

Very truly yours,

Hello,

I contacted your company last year and the folks I spoke with were very helpful in answering my reconstruction questions. Since then, I have graduated from reconstruction school and will be taking the ACTAR exam in October.

I am the sole proprietor of a surveying firm in Connecticut and I use a Leica robotic total station and Civil 3D for our land surveying projects.

What software do you use with your Leica ScanStation? I am interested to know because your 3D animations are awesome!

Any information you can share is certainly appreciated.
